before narratives explored the silences around illness and women's pain, Lorde questioned the rules of conformity for women's body images and supported the need to confront physical loss not hidden by prosthesis. Living as a "black, lesbian, mother, warrior, poet," Lorde heals and re-envisions herself on her own terms and offers her voice, grief, resistance, and courage to those dealing with their own diagnosis. Poetic and profoundly feminist, Lorde's testament gives visibility and strength to women with cancer to define themselves, and to transform their silence into language and action.
